

## Takes the Guess Out of Baking and Saves You Money

Every time you add baking powder, soda and salt to your baking it's more or less a guess. Too much or too little spoils the whole batch. OCCO-NEE-CHEE Self-Rising Flour has mixed with it, in the exact proportions, the very best baking powder, soda and salt. It saves you money because you don't have to buy these things extra. Figure what this cost would be on a barrel of flour.

### Airplane, continued from front page

machine travels at a speed of 90 miles; if the velocity of the wind is say, 30 miles, the machine makes just that much more speed—120 miles; if the machine is going against a 30 mile wind, the speed is retarded just that much. This type is really a self-starter.

When going 90 miles an hour, the engine makes 1400 revolutions per minute, but it can be throttled down to 1250, for a speed of 60 miles. Very seldom a machine makes less than 60 miles an hour. Less speed than that, unless at a high altitude, would cause a flop earthward. For a landing field, a space of at least 300 yards long is needed, and the same for taking off. To land the machine must skim the ground like a rock "skated" on the water, at a speed of 40 miles—and the aviator then gradually touches the ground when it runs along on two wheels about the size of Ford wheels, the tail of the machine serving as a drag to slow her up. This machine came from Camp Pole Monday afternoon, a total distance of 72 miles the way they came, in 75 minutes.

Tuesday afternoon at 3:30 the two aviators again took to the air, circled over Rockingham a few times and then headed for Hamlet where they spent Tuesday night, going to Wadesboro Wednesday, and to Monroe today (Thursday). Friday they go to Charlotte, then work their way northward back to Langley Field by way of Salisbury, Greensboro, Emporia etc.

No "Stunts"—loop-the-loops, spins, dives etc.—were attempted in their flights over Rockingham. Lt. Brandt informing the Post-Dispatch that he did these stunts when he started out two weeks ago but by reason of being so far from his base and his machine's fabric being somewhat worn, he deemed it best to do straight flying just now.

And why this visit, many will ask. Simply to let the people who seldom see an aeroplane have the opportunity, that universal interest may be quickened. The aviation department at Langley Field needs a large number of mechanics. There are 48 different mechanical trades to be followed at Langley Field, and if a man is physically qualified he will be taught to fly.

Undoubtedly, in the course of the next few years flying will be commercialized. An aeroplane mechanic will be in great demand and there will be aeroplane garages just the same as auto garages. And the mechanical men who reap the shekels then will be those who have taken their training in time. And that is the object of this machine's visit here Monday and Tuesday to interest men of a mechanical turn in aeronautic enlistment.

### School Children Can Secure Hand Grenades.

The war savings stamp organization has devised a plan for affording each school child in Rockingham and Richmond county an opportunity to secure a hand grenade savings bank, according to a letter received yesterday by Superintendent L. J. Bell from W. R. Timmons, director of educational and rural division of the war stamp organization.

These grenades were manufactured by the government for the purpose of presenting them to the Germans, but the war ended too early, so the school children will get them instead. However, the ingredients which would be contained in the grenades when the Germans got them will be missing when the school boys and girls get them.

The plan for getting a grenade is as follows:

One grenade will be loaned by a bank to any child under 17 years of age who signs a thrift agreement. When presented by the child filled with stamp money, it is to be opened by the bank and thrift or war savings stamps given in exchange for the nickels and dimes in the grenade bank. It will become the property of the child as soon as he has purchased through the bank one or more war savings stamps. The bank will fill out and give the child at the end of the vacation period a certificate of his summer savings in order that he may present the certificate to his teacher and get credit in the war savings society which is now or may be organized in his grade. The child must earn the money with which to buy the stamps.

The agreement which the child must sign states that "I accept this hand grenade savings bank, loaned me with the understanding that I will do odd jobs during the summer, keeping all the money that I can save in the grenade. I will bring it to the bank to be opened from time to time before school opens, and will invest my savings in thrift and war savings stamps. I understand that when I have saved enough to purchase one war savings stamp the hand grenade becomes my personal property. Otherwise it still remains the property of the bank. If I do not earn the grenade by October 1, 1919, I will return same to the bank.

The banks here have not received these grenades yet, but Mr. Bell said he would endeavor to encourage the school children to try and win a grenade, and the banks are expected to secure shipments soon.

### The Wonderful Call When Baby Comes

Like the Blast of Heavenly Trumpet When Call of Motherhood is Felt.

Of all the most vital times in a woman's life the coming of baby is fraught with the greatest meaning. Care should be exercised to insure that the crisis is passed in safety. Apprehension is avoided by the timely use of Mother's Friend, a preparation of penetrating oils and medicinal ingredients, which renders the muscles, cords, tendons and ligaments pliable, and thus tension is avoided. The usual nervousness, nausea, bearing-down and stretching pains are counteracted and the period is one of calm repose.

The broad, flat abdominal muscles relax with ease, and when baby comes the time at the crisis is less and pain and danger is avoided. Thousands of women for half a century have used this penetrating external application, prepared especially for expectant mothers, and every woman awaiting the crisis should give nature a helping hand.

Write the Brundage-Regulator Company, Dept. P, Lamar Building, Atlanta, Georgia, for their wonderful book, of great value to a woman, and obtain a bottle of Mother's Friend, the "crucial" and "best" preparation for motherhood.

### Notes from Geo. Wilson.

U. S. S. Vestal  
Hampton Roads, June 13

Dear Editor:—

Just a few lines to let you know I receive my Post-Dispatch each week, and divide same with Page.

Have had much fun since April 14th. Ten days leave in New York and Providence. Left N. Y. May 7th for Boston, arriving the 9th. Had shore liberty everyone of the 31 days there except two, and sure did have a good time in the Bean city. My third visit there. Squarest city, to be crooked, in the country. Every street crossing is called a square.

Rumored we will sail for West Coast August 7th, but I will be home by then. I will get my discharge July 4th while in New York. Saw Millard Davis while in Boston; he is o. k. Best wishes to the folks back home.

Very truly,  
George T. Wilson.

### Items of Route 5.

Crops are growing fine in this section now. The farmers are all about through cutting wheat; they are getting ready for the threshing.

A lot of young folks enjoyed an ice cream supper at Mr. Hamp Boltons last Saturday night.

Glad to see Mrs. Archie McNair able to be out again.

Mr. John L. McDonald and family and Mr. and Mrs. John Johnson were pleasant visitors at Mr. S. D. Peele's last Sunday afternoon.

Mr. E. T. Gibson and family made a call on Mr. Hamp Bolton one day last week.

Sorry to say Mr. Jim Morse does not get much better.

There seems to be a lot of widowers in this section who want them a girl, as they seem to like to talk to them so well.

Sorry to know that Mr. Robert Gibson is right sick at this writing; hope he will soon recover.

Bonny.

### Raising Potatoes.

R. J. Pence, Carrier for Route 3, has two sons in Marlboro County, S. C., four miles from Cllo, who made a good thing in raising Irish potatoes this year.

D. F. Pence made 250 barrels on 8 acres that he sold for \$1550, and R. F. Pence made 80 barrels on 2 acres that he sold for \$572. The potatoes were planted between rows of cotton, which really made five full acres of potatoes for which the two received \$2122. Of the joint 330 barrels, only 75 were No. 2's.
